

You're Invited!

Join the Lee Rain Team for an interactive discussion on how irrigation can be used as a powerful tool for maximizing production, efficiency and value on your farm.

Uncovering the Advantages of Using Irrigation as a Profit Tool

You'll Learn How:

- Irrigation is the missing link for influencing critical production inputs
- Underutilizing your irrigation as an optimization tool has hidden costs
- Focusing on the real-time needs of your crop (*Plant Water Health*) impacts the bottom line
- Managing production efficiencies and reducing resource use are essential to long-term growth and economic prosperity

Discussion to be followed by lunch.

ABOUT LEE RAIN

Since its founding in 1946, Lee Rain, Inc. has grown to be one of the largest irrigation solutions providers on the East Coast, building a reputation for excellence rooted in our deep understanding of the needs of our customers. For three generations, our family-operated business has put revolutionary science, technology, and methodology to work, supplying an innovative array of offerings—**AG MANAGEMENT STRATEGIES**; **IRRIGATION SOLUTIONS**, including Plant-triggered Irrigation; **AGRICULTURAL ANALYTICS**; and **SUSTAINABILITY PARTNERSHIPS**—that help our customers optimize their operations and advance sustainable growth. By collaborating with our customers to achieve their goals, we are realizing a new vision of how our growing world can thrive, *now and far into the future.*
