PRESENTING BIO360 BIODEGRADABLE & COMPOSTABLE MULCH FILM

Made of Mater-Bi®, Bio360 completely disappears without a trace and without leaving any toxic residues in the soil. It is an environmentally efficient alternative to traditional plastic mulch films. At the end of the season, the Bio360 does not need to be removed—the temperature, humidity, and microorganisms in the ground turn the Bio360 into water and carbon dioxide.

The Bio360 has the same properties and benefits as plastic mulch films, but with no negative impacts on the environment and no removal, recycling or landfill costs.

WHY USE BIO360 BIODEGRADABLE & COMPOSTABLE MULCH FILM?

- Use of clean & innovative technologies
- Avoid soil contamination
- Reduction of plastic waste
- Reduction of herbicide treatments in IPM and traditional horticulture

Lee Rain believes customer service is a job never done. From our skilled installers to our courteous administrative personnel to the dedicated members of the Fiocchi family, we strive to make every one of our valued customers' workdays a little bit easier.

PAYMENT

The pricing in this Drip Irrigation Catalog and the Online Store has our customers' bottom line in mind. In order to provide you with these competitive prices, no payment terms are offered. Note that credit card payments for amounts over \$2000 are subject to a 2% processing fee.

All pricing is subject to change without notice.
